

Your alternative for
an active oily phase

Discover, Cell'intact® OIL, a matrix that converted our best-seller active
into an oil-dispersible ingredient

Anti-pollution and antioxidant action

ADVANTAGES OF THE MATRIX

- Microemulsion W/O, isotropic and thermodynamically stable, that offers a new galenic created from an active aqueous solution
- Protects the active component against oxidation by encapsulating it in a reverse micelle
- Acts as a co-surfactant to stabilize the formula
- Increases the active biodisponibility in oily formulas
- Guides the formulator during the technical part of the formulation leaving him free to choose the final formula

AFFINITY FOR FORMULATION

This matrix will be easily formulated in an low polarity organic medium.
It offers high affinity with isodecanes, esters, silicones (dimethicone and CPS-cyclopentasiloxane),
and also with short-chain vegetable oils.
Last point, it will also increase the sprayable power of the formula.

APPLICATIONS

- «Active» make-up
- Hair care: shampoo, serum, etc (*natural foam booster*)
- Sun care
- Shaving

ORGANOLEPTIC CHARACTERISTICS

Appearance: Fluid, light and translucent oily liquid
Color: Yellow
